In Figure 4-5, the guest of the website can search for audios of their desire, go to the register page or learn about the website.

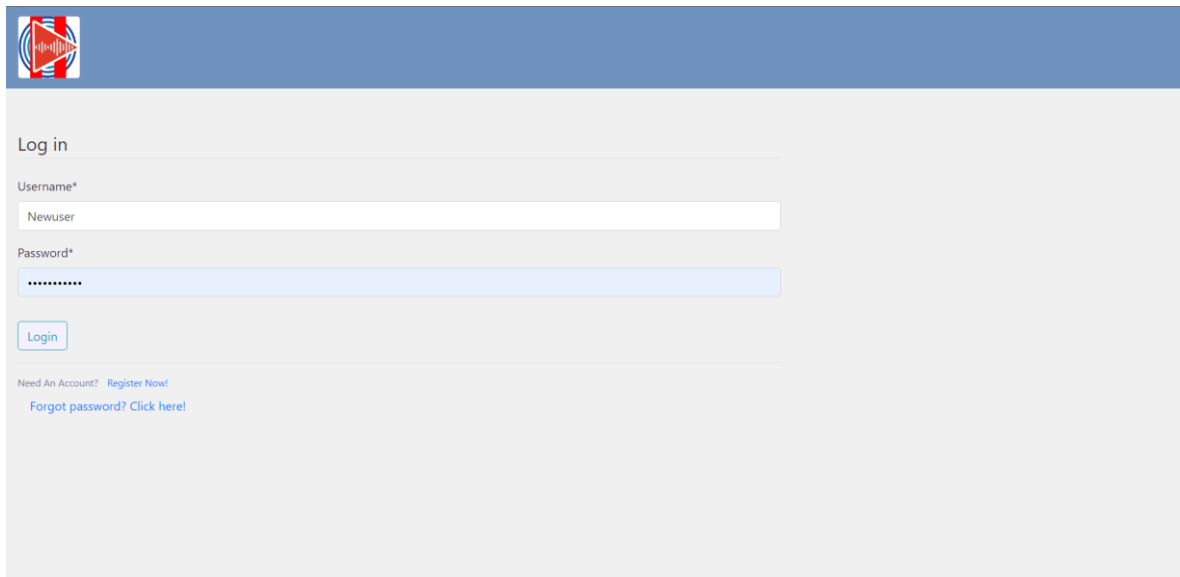

Figure 4-5 Main Page of Guest User.

Figure 4-6 shows that the user can either login or register to the site.

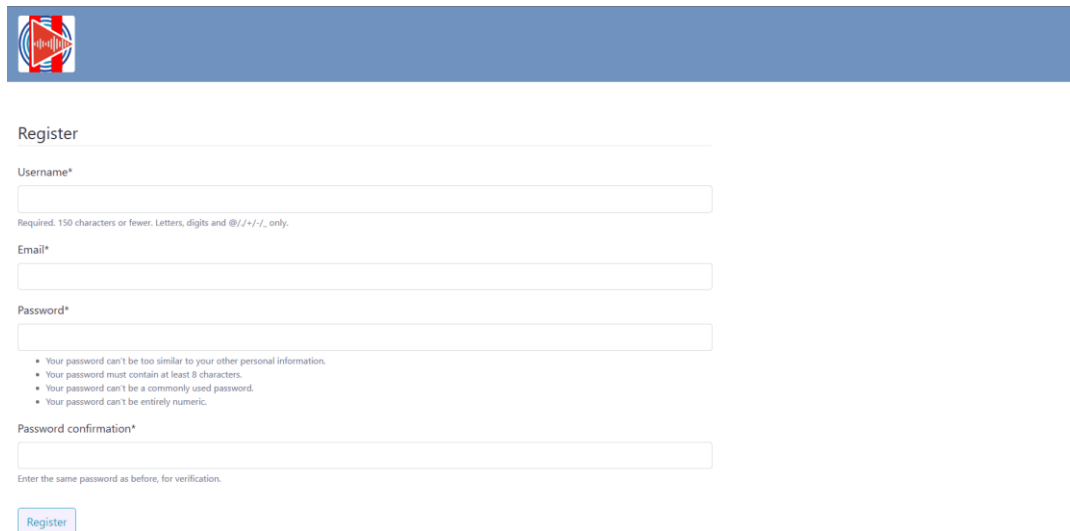

Figure 4-6 Login/Register Main Page

In Figure 4-7, the user can login into the website with their credentials.

Figure 4-7 System Login Main page

In Figure 4-8, the user can register into the system by providing a username, email and password.

Figure 4-8 Register Main Page

In Figure 4-9, the page is the main page for logged-in users, in which they can look at their last listened to posts, liked audios, most recent audios in the people they follow, their recommended audios, post or record an audio, and the most recent audios on the website.
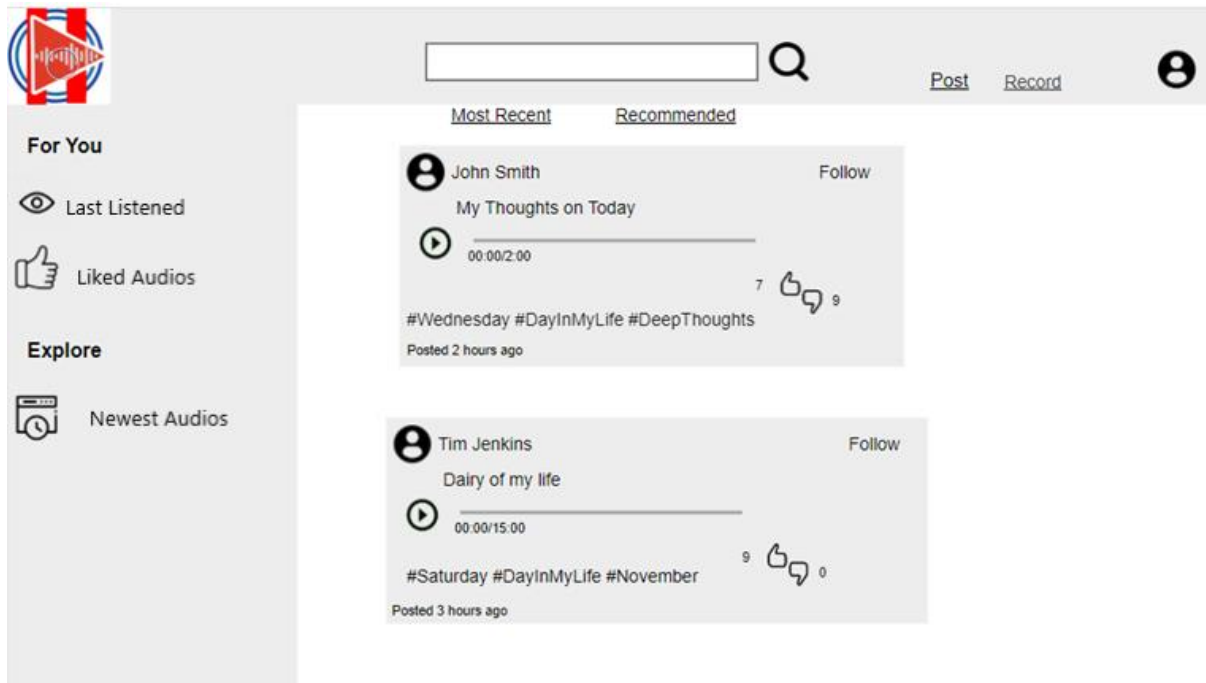

Figure 4-9 Logged-In User Main Page

Figure 4-10 shows the page after the user clicks the record button, which they can click on the microphone button to start live recording an audio.
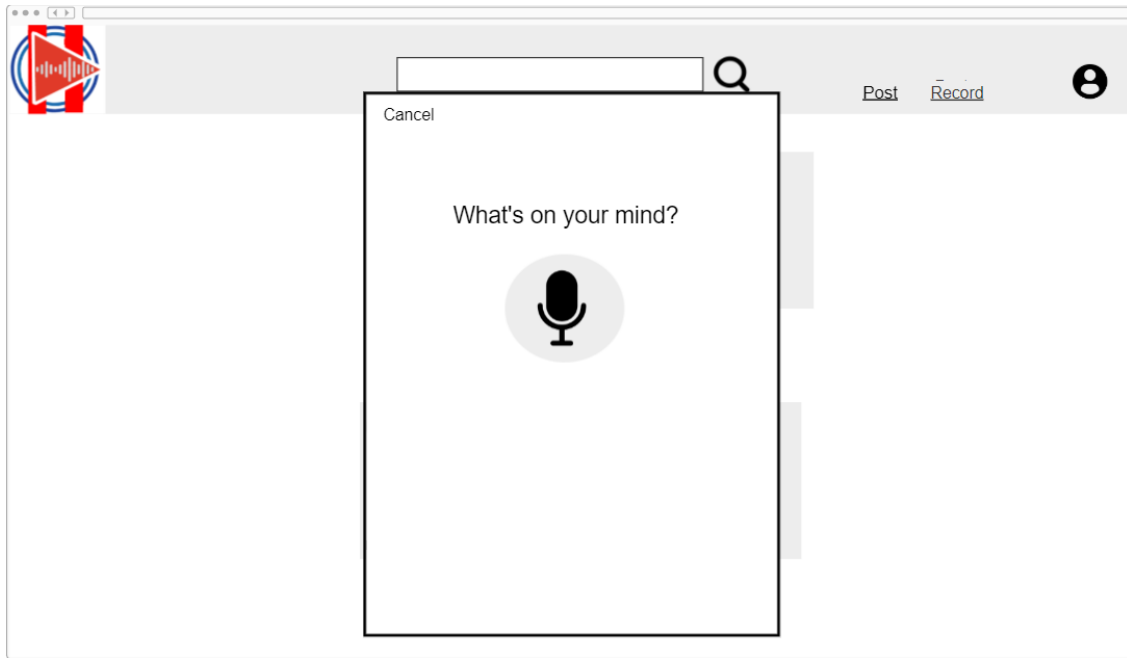

Figure 4-10 Record First Page

In Figure 4-11, the page will be shown as the user is recording. It shows a live feed of the sound waves of the user as well as the period of time they have been recording.

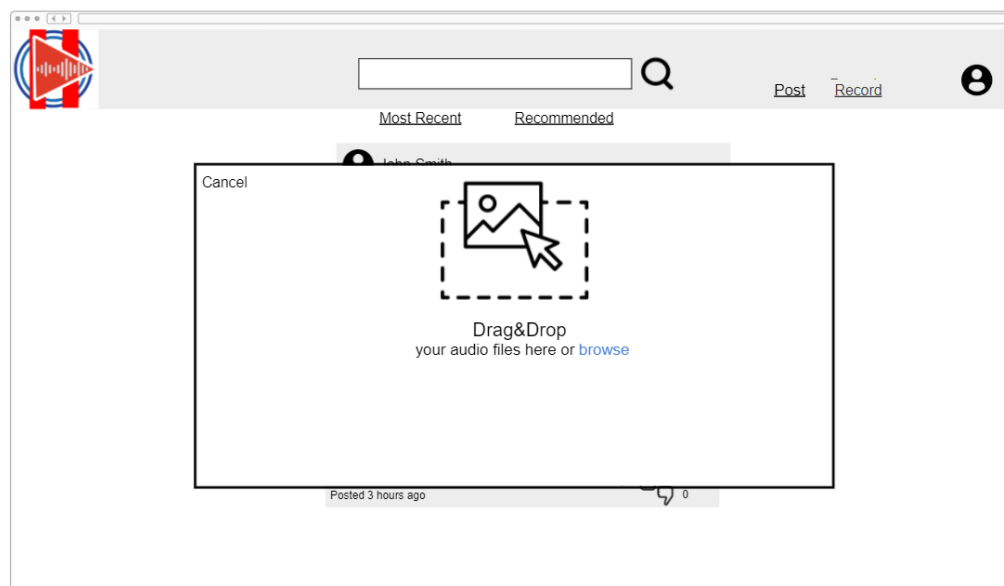

Figure 4-11 Recorded Audio In Progress

Figure 4-12 is the final record page in which the user can playback what they recorded, put a title to their recording, and add tags.

Figure 4-12 Finished Recorded Post

Figure 4-13 will be shown when the user clicks on the post button and the user can either drag an audio file into the window or browse through their system.

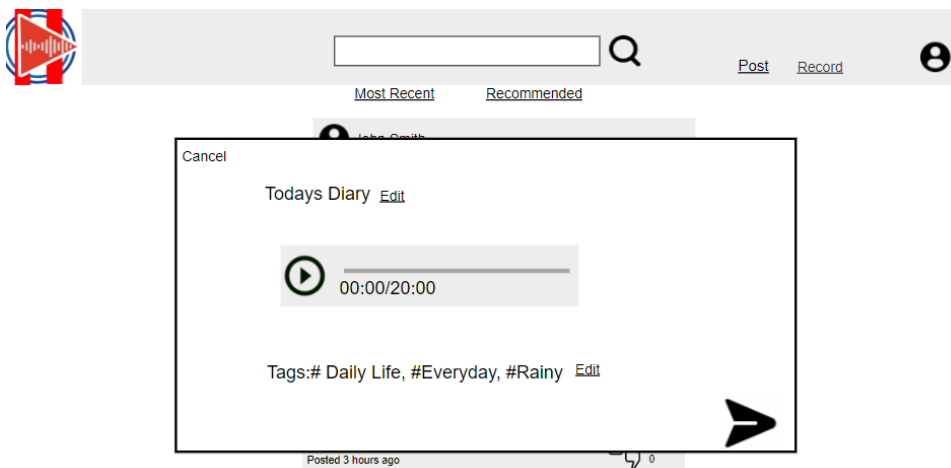

Figure 4-13 Post Audio First Page

Figure 4-14 will be shown when the user uploads the audio file that is in their system so they can give the audio file a title and add tags to that file.
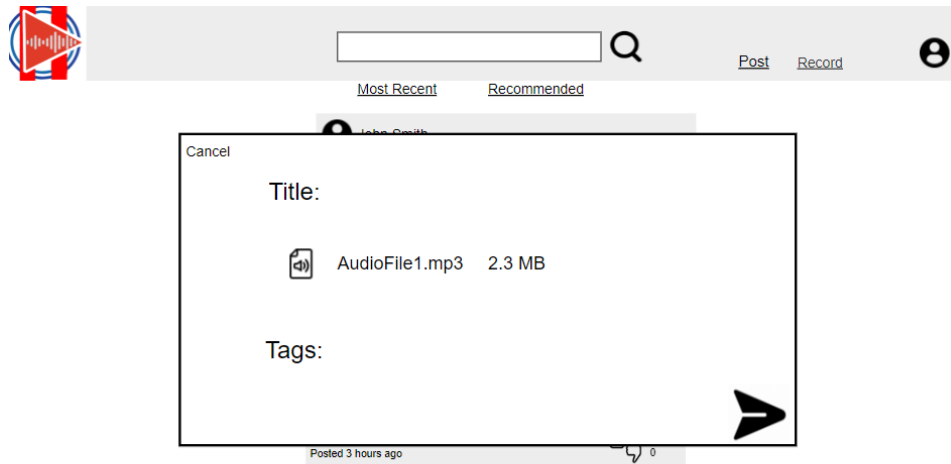

Figure 4-14 Post Audio Second Page

Figure 4-15 will be the final page after the user uploads their file and before the post is sent to review the title and tags and change if needed.

Figure 4-15 Post Audio Last Page

In Figure 4-16, if the user does not find any audio relating to their search, this error message will redirect the user to the homepage.

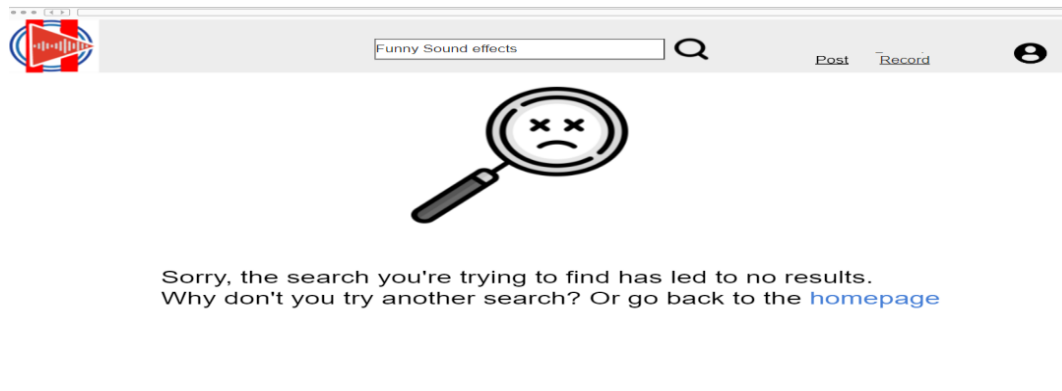

Figure 4-16 Search Not Found Page

In Figure 4-17, the users can update their details (username, email address, password).
